- Text object automatically added when creating a new label template

Summary of Changes (From Version 7.1 to Version 7.2)

- Support for the LabelWriter Twin Turbo printer

Summary of Changes (From Previous Versions to Version 7)

- Support for the LabelWriter 400 and 400 Turbo
- Updated drivers for the LabelWriter 300 series printers

Printer Support

DLS supports the following printer models
LabelWriter 400
LabelWriter 400 Turbo
LabelWriter Duo
LabelWriter Twin Turbo
LabelWriter 300
LabelWriter 310
LabelWriter 315
LabelWriter 320
LabelWriter 330
LabelWriter 330 Turbo
LabelManager PCII
LabelManager 450
LabelPoint 350

Earlier LabelWriter printer models are **NOT** supported by this version of DLS. In addition, the printers in the list above are only supported when connected through a USB port on your Macintosh computer. Printers connected to a serial port or using a Serial-to-USB adapter are **NOT** supported.

Installation

DLS requires that you have Mac OS **Administrator** level permissions to install a printer. You **MUST** be able to modify files in the System folder to install and configure a LabelWriter printer.

NOTE: Do not connect the USB cable to your computer until instructed to do so during the software installation. If you have a label printer already installed, disconnect the USB cable from your computer before running this installer and reconnect the cable when instructed to do so.

Manually Installing a Label Printer

Mac OS X v10.5 (all printers)
1. Make sure your label printer is plugged in and turned on before continuing.
2. Open System Preferences for Print & Fax.
3. Click the + button under the Printers list.
4. Select the label printer from the list of choices in the Printer List and click **Add**. The printer is added to the printer list.
5. Close the Printer Preferences to complete the installation.

Mac OS X v10.4, v10.3, and v10.2.8

Printers other than the LabelWriter Duo Printer

If you do not connect the label printer when asked to do so during the software installation or if you have problems with the printer installation, follow these instructions to add the printer manually:

1. Make sure your label printer is plugged in and turned on before continuing.
2. Open System Preferences for Print & Fax.
3. Click the + button under the Printers list.
4. Select **the label printer** from the list of choices in the Printer List and click **Add**. The printer is added to the printer list.
5. Close the Printer Preferences to complete the installation.

LabelWriter Duo Printer

The LabelWriter Duo printer appears as two separate printers in the Printer Browser: **DYMO DUO Tape** (or **DYMO DUO Tape 128**) and **DYMO DUO Label**. You need to install each of these printers separately.

1. Make sure your label printer is plugged in and turned on before continuing.
2. Open System Preferences for Print & Fax.
3. Click the + button under the Printers list. You may see the label printer(s) listed in the printer list but the **Add** button will not be available.
4. Click **More Printers** and select **DYMO DUO USB** from the drop-down list at the top of the Printer List dialog box.
5. Select **DYMO DUO Label** from the list of printers and click **Add**.
6. Repeat steps 3 through 5 to add **DYMO DUO Tape** (or **DYMO DUO Tape 128**).
   The LabelWriter Duo printer appears as two separate printers in the Printer list:
   DYMO DUO Tape (or **DYMO DUO Tape 128**) and **DYMO DUO Label**. You need to install each of these printers separately.

LabelWriter Duo Notes

- The LabelWriter Duo printer does not support Rendezvous. You will not be able to locate a LabelWriter Duo printer with Rendezvous.
- Printing to both the LabelWriter Duo Tape and Label printers at the same time is not recommended.

NOTE: *In some cases, you may not see your printer model listed in the Printer Setup utility or the Add button may be disabled. If this occurs, exit and restart the Printer Setup Utility.*

Compatibility

Microsoft Office X, 2004, and 2008
To use DYMO LabelWriter Add-In for Microsoft Office X and 2004, you must have Microsoft Office ServicePack 1 installed. If you do not have Service Pack 1 installed, you will not be able to see the LabelWriter icon in the Word toolbar. You can download the latest Service Pack for Microsoft Word, free of charge, from the Microsoft Web site.

Microsoft Excel
The Excel Add-in preview feature is not supported on Mac OS versions prior to 10.4 or on Microsoft Excel for Office X.

Upgrading from a Previous Version of DLS

If you are upgrading from DYMO Label Software version 6 or later, all of your label files and Address Bookfiles should continue to work with the new version of DLS. DLS version 5 and earlier labels and list filescannot be used with DLS 7.

If you have a LabelWriter 300 series printer, you must remove the printer and then add it back in the Printer Setup Utility to make sure you have all the latest label sizes available.
